

# Farmbot Documentation

The FarmBot Web Application is an interactive platform that allows both visitors and administrators to explore, manage, and demonstrate automated farming operations with ease.

## Visitor Features

- Seeding and Watering Demos: Execute live demonstrations of plant seeding and watering.
- Feedback and Q&A: Submit feedback and ask questions through the Q&A feature in the bottom-right corner of the app, and view your questions with answers in the Your Questions section on the sidebar

## Administrator Features

- Access advanced controls upon successful authentication.
- Create Task.
- View Jobs: Monitor all seeding and watering jobs under the View Jobs.
- Manage Plants: Add, modify, or delete plant varieties in the Manage Plant section.

## Additional Features

- Translation Support: Switch seamlessly between English and German via the sidebar translation feature.
- Interactive Interface Easy navigation for demos, Q&A, notifications, and job management.
